BLICKS Professional Gabion Fence

BLICKS Professional Gabion Fence

To provide and install **BLICKS Professional** Gabion Fence with a filling of hard and durable, sufficiently strong frost, weather and pressure resistant stone material.

Wire mesh baskets, made of electro-spot-welded, steel-wire mesh-grids with a tensile strength of $\geq 450 \text{ N/mm}^2$.

Sizes of modules (standard): Length:100cm/200cm (basic module or extension module)
Width: 23cm/30cm
Height:60cm/100cm/120cm/140cm/160cm/180cm/200cm
(Shortening and cutting of fence modules is possible in accordance to mesh sizes)

<u>module size:</u>	(LxWxH in cm) _____ cm		
<u>mesh size:</u>	5x20cm	5x10cm	2,5x10cm
<u>wire size:</u>	Ø 6,0mm	Ø 4,5mm vertical Ø 6,0mm horizontal	Ø 3,5mm vertical Ø 6,0mm horizontal

Staying rod: wire- Ø 4,5mm
Fixing hooks: wire- Ø 4,5mm
Fence post: Ø 60,3mm
Protection cap (post): Ø 60,3mm

All items are made of Zn95%/Al 5% wire – with a corrosion resistance of min. 3.000 h salt spray testing, according to DIN EN ISO 9227-NSS, with modified parameters as a minimum thickness of 350g/m^2 and a tensile strength of $\text{min.}450 \text{ N/mm}^2$.

Manufacturer DIN EN ISO 9001- certified, as well as user of the Quality Mark GABIONEN according to Quality Assurance Gabions and Gabion Structures RAL-GZ 612 and holder of an ETA (European Technical Assessment).

To install component parts and to fill with stone materials without voids according assembly instructions of supplier at construction site.

Filling: Sufficiently hard, durable, strong frost, weather and pressure resistant stone material. The grain size has to be bigger than the mesh size.

Total Height: up to _____ m
consisting of _____ pieces (LxWxH)/ basic modules
_____ pieces (LxWxH)/ extension modules
